since 1976

	Zero leakage metal seated rotary butterfly valves and check valves. ANSI class 150 to 1500 up to 160". Suitable for general & extreme applications
	Superior quality "PFA" teflon lined butterfly valves for highly corrosive applications
 ChemPharma Flow Solutions	<b>RESISTOFLEX</b> World leader in plastic (PTFE, PolyPro, PVDF) lined pipe and fittings <b>XOMOX</b> Complete line of quarter-turn sleeved plug valves, fully lined plug valves, ball valves & Butterfly Valves <b>Saunders</b> Complete line of manual and linear actuated diaphragm valves, weir & straight through type, non-return check valves <b>KROMBACH ARMATUREN</b> Unique ability to manufacture large quarter turn valves including ball valves, triple offset butterfly & check valves. These valves range in size from 3" to 36" <b>wta.</b> Bellows sealed globe, check, relief & change-over valves, strainers & special valves for special needs of the chemical and petrochemical industries
	"In-line" style and silent check valves to prevent or eliminate water hammer problems in any application for the modern day customer.
	Complete line of pinch valves, check valves, expansion joints and other products for all industries
	<b>Limitorque</b> Electric actuators for multi-turn and rotary applications using conventional and advanced technologies to reduce costs and increase operating efficiencies for customers <b>EDWARD VALVES</b> The highest quality gate globe and Check valves for all applications <b>VOGT</b> Valves is world leader in gate, globe and check valve manufacturing
	Corrosive resistant level transmitter isolation ball valve with built-in purge and calibration capabilities, highly engineered rotary joints
	Innovative and reliable products including "double seal" soft seated ball valves, high performance butterfly valves, actuators and controls
	Industry leader in the manufacture of severe service, high temperature & pressure metal seated ball valves
	Knife gate, wedge gate, globe, rubber lined butterfly, ball, check (regular and tilting), sampling valves and strainers
	150 to 2500 ANSI class cast, forged and alloy steels - gate, globe, check and ball valves, Newco steel products, OIC stainless steel products
	Ball, butterfly and check valves made of fiberglass and graphite reinforced resin materials for tough industrial applications
	Complete line of pneumatic, electro-pneumatic, digital "smart" valve positioners / controllers and valve accessories
	0.1" to 168" diameter electromagnetic flow meters with functional field distribution technology
	Extensive line of equipment for the networking, monitoring and control of process valves and equipment
	Swiss quality high performance knife gate valves for the most demanding applications in every industry
